

Generación AP®

The **AP® Spanish Language and Culture** course is centered around six rich themes that give students the opportunity to explore language in meaningful, real-world contexts. Generación AP® is built with these same goals in mind—to help students **communicate with confidence, think critically about global issues, and connect authentically with Spanish-speaking cultures**. Each chapter is organized into **two lessons**, each focusing on distinct subthemes (or recommended contexts), giving teachers both structure and flexibility. This format allows for a clear progression through all six AP® themes while leaving room for enrichment, review, and exam practice.

The six AP® themes that guide this course are:

- **Families & Communities** (*Las familias y las comunidades*)
- **Global Challenges** (*Los desafíos mundiales*)
- **Personal & Public Identities** (*Las identidades personales y públicas*)
- **Science & Technology** (*La ciencia y la tecnología*)
- **Beauty & Aesthetics** (*La belleza y la estética*)
- **Contemporary Life** (*La vida contemporánea*)

In the chapter openers, themes and contexts are explicitly named to help students recognize patterns and build familiarity. As they progress, students deepen their understanding, increase their comfort with the format, and apply what they've learned to new situations and task types—just like they'll need to do on the AP® exam. Additionally, each chapter combines **language, content, and culture** in a way that supports students as they build the skills they need to succeed on the AP® exam and beyond. Students don't just memorize vocabulary or grammar—they apply what they're learning to interpret authentic materials, engage in interpersonal tasks, and present their ideas in speech and writing.

Skills

Chapter 1 to Chapter 6

- Develop listening and reading skills
- Explore different types of text and media
- Validate sources; practice answering questions about a text
- Find connections between audial and written texts
- Develop vocabulary strategies
- Interpret graphs, tables, and statistics
- Compose an email
- Understand and practice writing argumentative essays
- Interpret literary texts
- Prepare for the simulated conversation
- Understand and practice cultural comparisons
- Provide practice with multiple-choice for texts, audios, combined texts and audio, interpersonal e-mail, argumentative essay, simulated conversation, and cultural comparison
- Focus on speaking & reading stamina; review vocabulary and grammar
- Differentiate task focus for student needs
